# Practice: Course Platforms

The goal of this tutorial is to introduce students to navigating the different platforms used in the course. All of these are linked on a Wiki page in your Canvas dashboard ("`Pages`" in the sidebar).

## Canvas (learning management system):

1. Wiki-page with important links
2. Mobile app for your phone
3. Calendar for all assignments
4. Zoom recordings of all classroom meetings
5. Gradebook (up to date)
6. Tests
7. Announcements

=> **Open the Canvas dashboard for this course and follow along.**

## GitHub repo: [github.com/birkenkrahe/cc-25](github.com/birkenkrahe/cc-25)

1. Lectures, assignments, solutions (Org-mode)
2. PDFs for lectures, assignments, solutions
3. Images

=> **Open the GitHub dashboard for this course and follow along.**

## Google Drive (automatically tied to your Lyon email):

1. Whiteboard screenshots
2. Large files for sharing
3. Automatically saved Google Colab notebooks - [Example](Example)

=> **Open the Wiki pages in Canvas for this course and follow along.**

## Google Chat Space (you should be a member already):

1. Motivational stuff
2. Videos, books, articles
3. Discussion with threads (use them!) - [Example](Example)

=> **Open the Google Chat Space for this course and follow along.**

## OneCompiler (register with Lyon email to keep your stuff)

1. Assignments (download from there, upload to Canvas)
2. Code along (during lectures and practice sessions)
3. Code on your own (for example during open-book tests)

=> **We will practice this together in the next session.**
